Dr. Roy P. Stonesifer, Jr. Associate Professor of History Edinboro State College Edinboro, Pennsylvania 16412

Dear Dr. Stonesifer:

We receive many requests for information on the assassination of President Kennedy and the related incidents.

It has become necessary to establish a policy not to release such information to unauthorized persons.

Very truly yours,

Chas, Batchelor Chief of Police

COMMONWEALTH OF PENNSYLVANIA DEPARTMENT OF PUBLIC INSTRUCTION EDINBORO STATE COLLEGE EDINBORO, PENNSYLVANIA Pleas: EE-350 of RE-360 February 16, 1967

Chief of Ballistice Bureau Dallas Police Department Dallas, Texas

Dear Sir:

Mr. Oreg Lessig, Instructor of Political Science and I are gathering information for an article for the <u>Southwestern Hatorical Quarterly</u>, dealing with the Hennedy assessination. We wish to assure you that our surpose is historical imovaledge rather than obserp semantionalism.

The theory we are attempting to gather evidence on is: that Cawalla had his .38 Special revolver, FSICOLO, with him in the Terus School Book Depository; that he fired two or three chots with his 6.5 mm. Rifle, CZ765, and then drew his pitch and fired one or two shots from it at the presidential car. This theory would explain the doubte arieing from the testimony of Royes G. Shiton, Fatrolana J. W. Foster, James T. Tague, and Fatrolana L. L. Hill. We are, thus, attempting to prove that Cawalla was the only assessin.

As to the revolver, no one saw his with it, at or near the Depository, but this does not mean that he did not have it in his belt, under his jacket. Of the four bullate recovered from the body of Patrolman Tippit, three were Windester-Western [lead with a trace of copper) and one was Remington-Westers [plain lead or lead alloy]. The empty certridge cases Newton and two Remington-Westers and two parts of the second work, however, to Michaelever-Meetern and two Remington-Newton control of the second work of the second work

You can help us if you have information on the metal content of the bullet splash found on the south curb of Main Street by Tague, and the content of the Remington-Fetere bullet removed from Tippit. Were they the same?

Another part that pussles us is that the Warren Report etatee that Captain J. W. Fits, after initial examination of the rifle, ejected a "cartridge" by operating the boit. Was this a live cartridge or merely the empty (third) cartridge case? Your assistance in this matter would be greatly appreciated.

Sincerely youre.

Roy P. Stonesifer, Jr., Ph.D. Associate Professor of History
